

Andrew Cruse is an Assistant Professor of Architecture at the Knowlton and a practicing architect. He is a member of the AIA, NCARB and is a LEED Accredited Professional.

Cruse's research focuses on architecture and energy. His recent projects include the exhibition "In the Air: Seeing architectural climates," at the Ohio State Banvard Gallery, and academic presentations on the evolution of human comfort in buildings. As part of his design practice, he is currently working on a glass pavilion on the Novartis Campus in Basel Switzerland.
