

Meera has over 22 years of experience in the building industry. As Principal at Spatial Synergy Studio LLC, she provides Architecture & Green Design Services; Green Consulting to Design Teams for Commercial and Institutional Projects; and Green Technical Assistance & Training to Non-Profit Housing Developers, City & State Government representatives and design professionals around the country. Projects include affordable, green, sustainable, energy efficient single-family homes & multi-family housing.

She is the architect for the first two gut-rehab projects in the Children's Hospital area that have received NSP (Neighborhood Stabilization Program) funding under the City of Columbus' and Franklin County's AWARE program. She was contracted by Enterprise Foundation, Washington DC, to monitor and mentor five non-profit developer teams for new construction and rehab projects funded by the City of Columbus' AWARE program financed with NSP grants from HUD (Housing and Urban Development, a US Federal Government entity).

In 2003, she founded the Central Ohio based nonprofit organization, Columbus Green Building Forum, which has advanced the practices of sustainability with education and outreach efforts. Through her work with the Forum, Meera has collaborated with local governments, nonprofit and community-based organizations to make Green building practices mainstream in Central Ohio.
