

**Lingying Zhao** is a Professor at Department of Food, Agricultural, and Biological Engineering, the Ohio State University. Dr. Zhao holds a Ph.D. degree in Agricultural Engineering from University of Illinois at Urbana-Champaign (UIUC), and M.S. and B.S. degrees in Bio-Environment Engineering from Beijing Agricultural Engineering University, China. She conducts research, teaching, and extension programs in agricultural air emissions, HVAC and energy efficiency of buildings, and mitigation of air pollution. She is especially interested in green residential buildings and animal production systems with alternative environmental control system using renewable energy. Currently, she serves as the faculty Director of enCORE, the 2011 OSU DOE Solar Decathlon Competition house, to promote research, teaching and outreach education programs in green homes.
