

Dr. Qian (Victoria) Chen joined The Ohio State University (OSU) in 2007 immediately after receiving her Ph.D. in Building Construction from Virginia Polytechnic Institute and State University. She is now an Associate Professor of Construction Systems Management. She had six years of construction industry work experience prior to her academic career. Dr. Chen's research focuses on high performance green buildings, construction safety, interface management, lean construction, etc. She has taught university courses in methods and materials, mechanical systems for buildings, construction project management, and green building and sustainable construction. She is a LEED Accredited Professional and an Editor of the Journal of Green Building. In recent years, Dr. Chen has led multiple student service learning, community engagement, and education and outreach projects in building energy efficiency, green home, and sustainable community development areas, and has received OSU's 2013 Emerging Community Engagement Award, 2013 Emerging Service Learning Award, and Ohio EPA's 2012 Outstanding Project Award for her green building and environmental education program.
